

AMENDMENTS TO THE SPECIFICATION

Please amend the Specification as follows:

Please replace the second full paragraph on page 10 of the specification with the following paragraph:

If the user selects the "Submit" icon 1003, then in some embodiments of the invention, the computer program sends the expense report data and the expense item data to a server via a wireless network. For example, the computer could send the data via a wireless network, such as the PALMTM network. Alternatively, the computer could send the data via a cellular phone network. In some embodiments of the invention the computer program also sends the temporary expense report IDs to the server. The server then sends final expense report IDs to the computer. In such embodiments, the temporary expense report IDs stored within the computer are replaced with the final expense report IDs received from the server. If no final expense report IDs are received from the server, then the computer may display an error message to the user.
